

Please do not weaken Indiana's phone privacy law - it works great. Our life is greatly improved.

Less phone interruptions of family life.

Our answering machine does not get filled with junk messages.

We can receive the phone call we want without our callers getting a busy signal.

Please do not let companies create the false excuse of having a pre-standing relationship when it is nothing but an excuse to interrupt our lives.

I have sent a previous message on this subject, but I feel I have 2 phone lines so I feel I may comment twice.
